Subject: Area Contingency Planning Handbook

Folks,

I am pleased to send you the first Area Contingency Planning (ACP) Handbook, developed by EPA's Inland ACP Workgroup. It incorporates the accumulated knowledge of years of contingency planning experience and provides national guidance for the program's environmental emergencies.

The attached memorandum describes the details of the Handbook and a list of the Inland ACP Workgroup members that participated in its development. Comments from the Oil and Removal Managers, OEM, and OGC have been incorporated. The Region 8 IG, who conducted an area contingency planning audit in Regions 5,6,8 and 10 also provided comments. Please let me know if you have any questions.

Thanks,
Dana T
